SKILLS

I am a Full Stack web developer primarily focused on frontend technology to achieve clean, dynamic application design. I work with Bootstrap often, making project completion quicker in addition to Github to keep track of files progress as well as collaborate with other developers.

Currently, I am developing a deeper knowledge with Javascript and backend technology with plans to dive deep into React and data visualization using D3.js and I'm looking for a position where I can progress, develop, and challenge my skills.

EDUCATION

University of Arizona, Tucson — *Bootcamp*

MARCH 2019 - CURRENTLY

Currently in the second half of my Full Stack course preparing for graduation.
